Quick Reference Guide 2008

Jane's global solutions overview

With more than 100 years of experience, Jane's, an IHS company, holds an unrivaled reputation for the reliability, accuracy and impartiality of our information and advice, trusted and relied upon by business, government and military decision-makers worldwide.

In the specialist fields of defense, security, public safety, transport and law enforcement, Jane's intelligence is a 'must have' resource for our clients, who can trust our intelligence over that from any other open source.

Jane's continues to push the boundaries in open source intelligence gathering, reporting and analysis. Our solutions offer the breadth, depth, accuracy and reach to meet a broad range of needs. Our high-speed electronic platforms give you on-demand access to the most relevant, accurate and timely intelligence.

In an increasingly competitive and uncertain world, you can trust Jane's to help you make the right decisions.

Aero-Engines

Jane's Aero-Engines provides comprehensive details of all civil and military gas-turbine engines (turbofans, turbojets, turboprops and turboshafts) currently in use worldwide for the propulsion of manned aircraft, listed in alphabetical order by country of origin. In addition to photographs and sectional drawings, detailed specifications of each engine are provided together with development profiles. Also included are tables of data for current types of piston engine. Manufacturers' details are listed for all current engine makers.

Aircraft Component Manufacturers

Jane's Aircraft Component Manufacturers provides you with coverage of companies and organizations that supply, produce and repair components and major sub-assemblies for fixed- and rotary-wing aircraft, for both the civil and military markets. Find out who is selling what to whom, where the market opportunities lie and what technical advances are being made. Country by country you will find comprehensive details on more than 100 aircraft currently under production, making this your indispensable market guide.

Aircraft Upgrades

Jane's Aircraft Upgrades contains full descriptions of the world's most significant fixed- and rotary-wing aircraft no longer in production but still in service. It is a complete resource for market intelligence, threat assessment and recognition and serves as the complete companion to Jane's All the World's Aircraft. Alphabetically, by manufacturer, there are full technical descriptions of both commercial and military aircraft, followed by the latest upgrade programs associated with each type, particularly in the commercial sector. There are also full descriptions of the aircraft manufacturers and upgrade companies worldwide. Many of the aircraft types in operational use around the globe are no longer in full-scale production. Insight is provided into the latest technological advances for the aviation industry from every diesel engine performance upgrade to the latest precision targeting technology for military combat platforms.

Air-Launched Weapons

Jane's Air-Launched Weapons is the only accessible and constantly updated guide to the world's inventories of airborne weapons. Covering well over 600 systems, in service or in development, it provides a detailed and comprehensive reference to: capabilities and technology; functionality and effectiveness; user base; combat record; upgrades, variants and future enhancements. Entries are partnered with extensive analysis tables covering all weapon types, national inventories and aircraft weapon loads. The guide documents the world's air-to-air and air-to-surface missiles, bombs, rockets, guns and underwater weapons, including new and emerging weapon capabilities.

All the World's Aircraft

Jane's All the World's Aircraft sets the standard in aviation reference. It provides exhaustive technical detail on over 1,000 civil and military aircraft currently being produced or under development by more than 560 companies. Photographs and line drawings aid recognition and comparison, giving you the ability to evaluate competitors, recognize trends in aerospace development, identify potential buyers and select business partners. You can check key specifications for any aircraft, including dimensions, performance, structure, landing gear, power plants and armaments. In addition, there are details of the world's aircraft manufacturers and their programs, so you can identify key contracts, production rates, customers and order backlogs.

Chem-Bio Handbook: 3rd Edition

Training and a flexible emergency response plan is the basis of effective front-line defense against a chemical or biological threat. Jane's Chem-Bio Handbook, now in its third edition, provides the most comprehensive single-source instruction to date for both first-responders and all others who may be involved in a chem-bio incident. This edition includes more in-depth site vulnerability information and is organized to increase overall usability in the field. New content includes mission critical strategic considerations (risk management, co-ordination between local, state and federal agencies, etc.), a breakdown of NIMS (National Incident Management System), and separate coverage of chemical and biological incidents (key differences between the two types of incidents and the required respective responses).

Chem-Bio Handbook: International

Jane's Chem-Bio Handbook: International has been developed by experts from the fire and police services, as well as from the military. Considering and addressing the needs of UK and international first-responders, this comprehensive pocket guide details the range of critical planning and response procedures for a chem-bio incident. Fundamental on-scene procedural information ensures international first-responders have the resources necessary in planning for, responding to and managing the aftermath of a chem-bio incident. Customization of handbooks, for quantities of 500 or more, is available to allow you to integrate the expertise of Jane's information with your organization's details. Based on the Jane's Chem-Bio Handbook: Second Edition, the Jane's Chem-Bio Handbook: International is a comprehensive pocket guide detailing the range of critical planning and response procedures for a chem-bio incident. Bulk pricing is also available through your local Jane's representative.

Citizen's Safety Guide

Jane's Citizen's Safety Guide is an all-hazards resource, providing emergency procedures and checklists for individuals and families to prevent, respond to and recover from natural disasters, mechanical accidents and human-caused emergencies, including terrorism. The guide empowers private citizens with the tools and confidence to deal with critical issues, such as talking with children, dealing with loss, handling the media and providing volunteer assistance. Jane's Citizen's Safety Guide makes complex and difficult topics easy to understand through concise explanations, comprehensive charts, case studies and chapter overviews and quizzes. Also included are tear-out cards for Emergency Contact Telephone Numbers and Family Disaster Plans (scheduled meeting place, contact information, etc.).

Facility Security Handbook: 2nd Edition

The Jane's Facility Security Handbook: Second Edition is a comprehensive yet easy-to-use guidebook designed to help you prepare for and manage disasters of all kinds. Written by an international team of experts from law enforcement, emergency management, counter-terrorism, risk management and security, this unique guide is an essential tool for anyone responsible for facility management, from risk managers to security directors to emergency responders. The handbook uses a simple five-phase methodology with chapters covering each critical element of disaster management. It also provides a number of useful quick reference guides, including a Glossary of Security Terms and Acronyms, and an overview of the US Department of Homeland Security's National Incident Management System (NIMS).

Mass Casualty Handbook: Hospital

Jane's Mass Casualty Handbook: Hospital is designed for physicians, nurses and other hospital-based personnel responding to mass casualty incidents, particularly chemical, biological, radiological, nuclear or explosive incidents. The handbook provides focused guidance in developing emergency management capabilities, including an effective and robust Emergency Operations Plan (EOP). The procedures and policies recommended are practical, cost-effective, sustainable and applicable for all hazards and day-to-day operations. Background information, general guidelines and system requirements allow each healthcare facility to make use of the material according to their specific needs, while building on existing standards and procedures such as HEICS and JCAHO. The handbook also provides principles and checklists aimed at enhancing preparedness, while adhering to a 'system approach' by offering helpful hints to encourage management, doctors and other hospital staff to work together.
